NOTIFICATION OF TRANSMITTAL OF THE INTERNATIONAL SEARCH REPORT AND THE WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY. OR THE DECLARATION

	SEARCHING AUTHORITY, OR THE DECLARATION (PCT Rule 44.1)		
	Date of mailing (day/month/year) 1 5 FEB 2006		
Applicant's or agent's file reference 645 PCT	FOR FURTHER ACTION See paragraphs 1 and 4 below		
International application No. PCT/US04/38043	International filing date (day/month/year) 15 November 2004 (15.11.2004)		
Applicant ADVANCED TECHNOLOGY MATERIALS, INC.			

4. Reminders

Shortly after the expiration of 18 months from the priority date, the international application will be published by the International Bureau. If the applicant wishes to avoid or postpone publication, a notice of withdrawal of the international application, or of the priority claim, must reach the International Bureau as provided in Rules 90bis.1 and 90bis.3, respectively, before the completion of the technical preparations for international publication.

no decision has been made yet on the protest; the applicant will be notified as soon as a decision is made.

The applicant may submit comments on an informal basis on the written opinion of the International Searching Authority to the International Bureau. The International Bureau will send a copy of such comments to all designated Offices unless an international preliminary examination report has been or is to be established. These comments would also be made available to the public but not before the expiration of 30 months from the priority date.

Within 19 months from the priority date, but only in respect of some designated Offices, a demand for international preliminary examination must be filed if the applicant wishes to postpone the entry into the national phase until 30 months from the priority date (in some Offices even later); otherwise, the applicant must, within 20 months from the priority date, perform the prescribed acts for entry into the national phase before those designated Offices.

In respect of other designated Offices, the time limit of 30 months (or later) will apply even if no demand is filed within 19 months.

See the Annex to Form PCT/IB/301 and, for details about the applicable time limits, Office by Office, see the PCT Applicant's Guide, Volume II, National Chapters and the WIPO Internet site.

2. FURTHER ACTION If a demand for international preliminary examination is made, this opinion will be considered to be a written opinion of the International Preliminary Examining Authority ("IPEA") except that this does not apply where the applicant chooses an Authority other than this one to be the IPEA and the chosen IPEA has notified the International Bureau under Rule 66.1 bis(b) that written opinions of this International Searching Authority will not be so considered.					
If this opinion is, as provided above, considered to be a written opinion of the IPEA, the applicant is invited to submit to the IPEA a written reply together, where appropriate, with amendments, before the expiration of 3 months from the date of mailing of Form PCT/ISA/220 or before the expiration of 22 months from the priority date, whichever expires later. For further options, see Form PCT/ISA/220.					
3. For further details, see notes to Form PCT/ISA/220.

WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY

International application No.	
DCT/I ISO4/29042	

Box No. I Basis of this opinion				
1. With regard to the language, this opinion has been established on the basis of: the international application in the language in which it was filed a translation of the international application into, which is the language of a translation furnished for the purposes of international search (Rules 12.3(a) and 23.1(b)).				
2. With regard to any nucleotide and/or amino acid sequence disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of:				
a. type of material a sequence listing table(s) related to the sequence listing				
b. format of material on paper in electronic form				
c. time of filing/furnishing contained in the international application as filed. filed together with the international application in electronic form. furnished subsequently to this Authority for the purposes of search.				
3. In addition, in the case that more than one version or copy of a sequence listing and/or table(s) relating thereto has been filed or furnished, the required statements that the information in the subsequent or additional copies is identical to that in the application as filed or does not go beyond the application as filed, as appropriate, were furnished.				
4. Additional comments:				

WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY

International application No. PCT/US04/38043

NO

Box No. V Reasoned statement under Rule 43 bis.1(a)(i) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement		
Novelty (N)	Claims 6-8 and 17	YES
	Claims 1-5,9-16 and 18-22	NO
Inventive step (IS)	Claims 6-8 and 17	YES
	Claims 1-5,9-16 and 18-22	NO
Industrial applicability (IA)	Claims 1-22	YES

Claims NONE

2. Citations and explanations:

Claims 1-5, 9-19, 21 lack novelty under PCT Article 33(2) as being anticipated by James et al. (US 6,337,281).

James describes a CMP pad comprising: polyurethane including polyol, diisocyanate (col. 5, lines 50-64) forming claimed organic polymer, which would be reactive with any of the materials listed in claim 4; an oxidizing metal complexes, iron salts to promote oxidation of the metal layer to its corresponding oxide (claimed metal agent compatible with a metal of a metal feature)

The pad further comprises matrix materials as continuous phase including esters sulfone, which would provide claimed polyester or polyfulfone (col. 3, line 33-55).

Referring to claims 9, 21, the pad is used to polish metal on a substrate (col. 1, line 44-52).

Referring to claims 11-13, 15, 16 the pad and the chemicals in pad would have the same properties since they are the same chemicals as that of the claimed invention.

Referring to claim 18, the method of mixing the chemicals to form the pad would have to have foaming and curing agent since the method includes foaming and curing steps (col. 6, line 60, 57; col. 8, line 56; col. 10, line 66; col. 11, line 8).

Claims 19, 22 lack an inventive step under PCT Article 33(3) as being obvious over James.

Referring to claim 19, sawing the pad from a log is obvious in order to produce the pad. Referring to claim 22, having the pad and the wafer moving or rotating in different direction are well known to one skilled in the art during the polishing of the wafer (please see cited Koos et al. US 5,934,980, fig. 2).

Claims 6-8, 17, meet the criteria set out in PCT Article 33(2)-(3), because the prior art does not teach or fairly suggest the metal agent includes a metal B-diketonate.

Claims 1-22 meet the criteria set out in PCT Article 33(4), and thus meet industrial applicability because the subject matter claimed can be made or used in industry.
